Education

- **Loughborough University** — Loughborough, UK
  BSc (Hons) Computer Science — Sep 2024 - Jun 2027
  - Average Grade: 75%
  - Relevant Modules: Software Engineering, Algorithms Analysis, Cloud Computing, Formal Methods, Theory of Computation, Databases, Distributed Systems, Robotics
- **Six21/School21** — London, UK
  A-Levels & GCSEs — Sep 2016 - Jul 2022
  - A-Levels: Mathematics (A), Computer Science (B), Politics (B)
  - GCSEs: 9 grades A*-A, including Mathematics (8) and English (8)

Work Experience

- **Gordon's Wine Bar** — London, UK
  Waiter — Sep 2022 - Present
  - Manage high-volume service of 350+ covers per shift and process 400+ daily transactions across peak periods
- **Adapt (App Development)** — London, UK
  Software Intern — Feb 2020 - May 2020
  - Programmed core UI modules and interactive quiz features for a student revision mobile application using JavaScript and React Native, supporting over 10,000 active users
- **Ministry of Justice** — London, UK
  Work Experience — Sep 2019 - Feb 2020
  - Evaluated internal HR frameworks affecting 500+ department staff and delivered concrete policy recommendations, resulting in a 15% increase in accessibility compliance
  - Ran 3 cross-department workshops and tracked survey metrics for 200+ participants, leading to the rollout of a targeted mentorship strategy for underrepresented groups

Technical Projects

- **Final Year Project: Programming Language Design & Implementation** — Loughborough, UK
  Academic Project — Sep 2026 - Present
  - Building a custom programming language from scratch using Python, implementing a recursive descent parser and lexer to evaluate complex mathematical expressions and control flow structures
  - Optimising compiler execution to achieve sub-50ms compilation speed and 90% test coverage across core test programmes
  - Constructing concrete error handling mechanisms, including precise syntax diagnostics and line-level stack traces
- **Full-Stack Project Management Dashboard** — Loughborough, UK
  Academic Project — Sep 2025 - Mar 2026
  - Architected a full-stack project management application using React, Node.js, and PostgreSQL to support a simulated workload of 500+ concurrent users
  - Configured and deployed database infrastructure using Google Cloud Platform (GCP) on a scalable Linux VM, maintaining 99.99% uptime for a 50GB database
  - Implemented 20+ RESTful API endpoints connecting the frontend interface with the backend database, achieving average query response times of under 100ms

Extracurriculars & Hackathons

- **Loughborough Hackathon** — Loughborough, UK
  Voice-Changing EDI Tool — Sep 2025 - Oct 2025
  - Designed a system in a team of 4 to allow users to change their voice in real-time to prevent bias during interviews, securing a second place finish out of 15 participating teams
  - Integrated the ElevenLabs API to execute real-time speech transformations with sub-200ms latency
- **Meta Hackathon** — UK
  Algorithmic Math Solver — Nov 2025 - Dec 2025
  - Engineered efficient Python algorithms to solve 15 highly complex mathematical problems under strict time constraints, achieving a third place finish against a cohort of 20+ teams

Additional Information

- **Languages**: English (Fluent), Lithuanian (Native)
- **Technical Skills**: Python, Java, Kotlin, PHP, SQL, JavaScript, HTML/CSS, Google Cloud Platform (GCP), Linux, React, Node.js, PostgreSQL, Git
- **Interests**: Weightlifting, indoor cycling, chess (1500 ELO rating)
